PGP 8503 - Teaching Practicum

Observation Protocol (for students observing colleagues)

Peer observation.

Name of Student:

A-N Sumadasena.

Date and time: *30.06.2026*

Place: *A/Gamininewwa Vidyalaya.*

Language skills and functions taught: *Grade 03- Expressing likes & dislikes (I like/I don't like)*

Evaluate the student based on the criteria given below. Please use additional paper if necessary.

Write down specific example(s) from the teaching observation to support your comment.

	Criterion	Comment
1	Classroom management	<i>The teacher managed the class well and organized pair, group and individual activities effectively. However clearer time limits during group could further improve learner focus.</i>
2	Teacher talks time vs. student talk time	<i>Learners had opportunities to speak during pair & group activities. However, the teacher could further reduce teacher talk and encourage more individual learner responses.</i>
3	Rapport with students	<i>The teacher maintained a positive relationship with learners & encouraged participation. Some quieter learners could be engaged more actively during discussions.</i>

4	Scaffolding	Appropriate scaffolding was provided through picture cards, modelling & guided questions. Additional prompts could be given to weaker learners during independent tasks.
5	Pacing and timing	The lesson followed the planned timing well. However, slightly more time for learners to share their ideas would strengthen the learning experience.
6	Monitoring and feedback	Teacher monitored learners & provided feedback throughout the lesson. More individual feedback could be given to learners who experienced difficulties.
7	Communicative focus of materials, tasks, and activities	The activities encouraged learners to use the target language meaningfully. Including one more real-life speaking task could further improve communicative practice.
8	Balance and variety of tasks	The lesson included a good variety of pair, group & individual activities. A short movement-based activity could increase learner engagement.
9	Appropriateness of Teaching methodologies	The teaching methods were suitable for the lesson objectives & learner level. More opportunities for learners to discover language independently would further strengthen the lesson.
10	Facilitation of students' independent learning	Learners completed independent tasks successfully. Encouraging learners to reflect on or self-correct their work before teacher feedback would promote greater learner autonomy.

Positive features of the lesson:

- The lesson was well organized and learner centered.
- Teaching materials supported learner understanding effectively.
- Activities gradually progressed from guided practice to independent learning.

Points to work on for the next lesson:

- Increase opportunities for individual learner talk & peer interaction.
- Include more learner self-assessment or reflection before teacher feedback.
- Add one more communicative activity that relates to learners' real-life experience.

Overall comment:

The lesson was well planned & suitable for the learners. The teacher demonstrated good classroom management & used appropriate teaching methods. With more learner-centered interaction & additional opportunities for independent thinking & self-correction, the lesson could become even more effective.

Signature of the Student:
