

Peer Observation.

Observation Protocol (for students observing colleagues)

Name of Student:

Date and time: 11.06.2026

Place: A/Gaminiwewa Vidyalaya

A.N. Sumanasena.

Language skills and functions taught: Grade 03 - am/is/are - (Helping Verbs)

Evaluate the student based on the criteria given below. Please use additional paper if

necessary. Write down specific example(s) from the teaching observation to support your comment.

	Criterion	Comment
1	Classroom management	The lesson was organized well & learners moved from group work to individual work smoothly. However, clearer classroom routines could help maximise learning time.
2	Teacher talks time vs. student talk time	The tr provided clear explanations, but learner talk was mainly limited to answering questions. More pair speaking activities would increase learner participation.
3	Rapport with students	The tr maintained a friendly atmosphere & encouraged learners to answer questions. More opportunities could be given to involve quieter learners.

4	Scaffolding	visual aids & examples supported learners' understanding. Additional guided practice before independent work would benefit weaker learners.
5	Pacing and timing	The lesson followed the planned timing. However, the explanation stage appeared slightly longer than learner practice stages.
6	Monitoring and feedback	The tr monitored learners during activities & provided support when necessary. More individual feedback could strengthen confidence.
7	Communicative focus of materials, tasks, and activities	The worksheets helped learners practise grammar accurately. However, more meaningful speaking activities using real-life situations would improve communicative language use.
8	Balance and variety of tasks	The lesson included explanation, group work, individual work & assessment. Adding a short interactive game could further increase learner engagement.
9	Appropriateness of Teaching methodologies	The teaching methods were suitable for grade 03 learners. However, guided discovery could be used more instead of direct explanation to encourage active learning.
10	Facilitation of students' independent learning	Learners completed independent worksheets successfully. Encouraging self-checking before teacher correction would further

develop learner autonomy.

Positive features of the lesson:

- The lesson objectives were clear & appropriate for grade 03 learners.
- Attractive visual aids & worksheets supported grammar learning.
- The lesson progressed logically from presentation to practice, assessment & follow-up.

Points to work on for the next lesson:

- Reduce teacher explanation & increase learner talk.
- Include one communicative pair activity using amlis/are in real-life contexts.
- Encourage learners to check & discuss their own answers before teacher feedback.

Overall comment:

The lesson was well structured & suitable for grade 03 learners. The teacher used appropriate teaching materials & managed the lesson effectively.

Increasing learner interaction & reducing teacher-centered explanations would make the lesson more communicative & learner-centered.
