MA in TESL 2025/26
PGP 8503 – Teaching Practicum

Observation Protocol (for Mentors and Supervisors)

Name of Student: A.N. Sumanasena.

Date and time: 02.06.2026

Name of Mentor/Supervisor: G.P.M. Perera

Place: A/Gaminiwewa Viduhala.

Language skills and functions taught: Simple present tense-Interrogative form. - Grade 06

Evaluate the student based on the criteria given below. Please use additional paper if necessary.

Write down specific example(s) from the teaching observation to support your comment.

	Criterion	Comment
1	Classroom management	The teacher managed pair work, group work and individual work effectively. However, clearer time reminders during group activities would help learners stay on task.
2	Teacher talks time vs. student talk time	The teacher provided clear explanations and demonstrations. More opportunities could be given for learners to ask and answer questions independently to further increase student talk time.
3	Rapport with students	The teacher maintained a friendly and supportive learning atmosphere. Encouraging quieter learners to participate more actively would further strengthen classroom interaction.

4	Scaffolding	Appropriate scaffolding was provided through colour coding, structure strips, guided examples and peer support. Some weaker learners may still require additional oral practice before independent work.
5	Pacing and timing	The lesson followed a logical sequence and the allocated time was generally appropriate. Slightly more time for the production stage could encourage richer communication.
6	Monitoring and feedback	The teacher monitored learners continuously and provided feedback during pair & group work. More individual corrective feedback could improve learners' grammatical accuracy.
7	Communicative focus of materials, tasks, and activities	The activities encouraged learners to ask and answer questions using the target structure. Incorporating more authentic, real-life situations could make communication more meaningful.
8	Balance and variety of tasks	The lesson included presentation, pairwork, group work, individual assessment and homework. The variety of tasks maintained learner engagement throughout the lesson.
9	Appropriateness of teaching methodologies	The selected teaching strategies were appropriate for grade 6 learners & supported the lesson objectives. Guided discovery could be further strengthened by allowing learners to identify grammar patterns before teacher explanation.
10	Facilitation of students' independent learning	Learners completed the individual worksheet & exit ticket independently. Encouraging learners to self-check or peer-check before teacher correction would further promote learner autonomy.

Positive features of the lesson: The lesson was well structured & learner-centred. Activities progressed logically from presentation to guided practice, production & assessment. Appropriate scaffolding strategies supported mixed-ability learners.

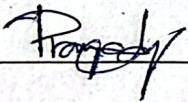

Points to work on for the next lesson:

Increase learner talk by reducing teacher explanation where possible. Include more authentic communicative tasks related to learners' daily lives. Provide opportunities for self-assessment before teacher feedback.

Overall comment:

The lesson was well planned & aligned with the intended learning outcomes. The teacher effectively supported learners through a variety of activities & appropriate scaffolding. Further emphasis on learner autonomy & communicative interaction would make the lesson even more effective.
